Subject: 4 easy ways to become a superhero

Image Copy: Be the hero your website needs.

Hello (Name),

In a world full of cyber villains, be a superhero.

Here are 4 easy ways you can acquire superpowers and save the day:

1. Get into a radioactive accident.
2. Be or meet a supernatural being.
3. Become an orphaned billionaire.
4. Protect your website with SiteLock.

[SiteLock website security](#) can help you shield your site from malicious traffic, sense malware and proactively smash it before it becomes a threat.

Be the hero your website needs.

Call us today to learn more about website security.

Subject: Is your business' website protected against a cyberattack?

Image Copy: Protect your site from cyberattacks.

Hello (Name),

Did you know that the average website is attacked 50 times per day? That's just over 18,000 attacks per year!

Why are these cyberattacks happening and who is responsible?

Cybercriminals build [bots](#) that search the internet for websites with [vulnerabilities](#) that they can exploit. Most sites receive an average of 152 million bot visits weekly. Once a bot identifies a target, they use a variety of techniques to gain access to infect a site with [malware](#) and steal resources like bandwidth, website traffic, and customer data including email addresses.

No website is too small to be attacked. In fact, [the most common targets are blogs, small businesses, and non-profit sites](#). As many as 18.5 million websites are infected with malicious content at any given moment!

Your website is important to your business' success, so how can you avoid becoming one of these statistics?

Protect your site from cybercriminals, malware, defacement, data theft, blacklisting, and site suspension with a website security solution.

Call us today to discuss safeguarding your site with SiteLock.
